Dr. Yuichi S. Hayakawa

## ACQUISITION AND ANALYSIS OF HIGH-DEFINITION POINT CLOUD DATA: GEOMORPHOLOGICAL APPLICATIONS

Dr. Yuichi Hayakawa is an Associate Professor at the Center for Spatial Information Science, the University of Tokyo, Japan. His research interest is related to the landform evolution rates using GIS and RS, spatial distribution of knickzones in bedrock rivers, and human-induced changes in landforms. He is credited with a number of important publications including the prestigious journal Science.
